

## Building site to Lazise

**Ref. P 24.34**

Lazise, Colà hamlet, new construction consisting of 6 residential units spread over various floors.

Ground floor units will have an exclusive garden, while first floor units will have access to exclusive terraces. Each unit will have a garage and a cellar at its disposal.

Condominium-type heating and cooling system with separate meters for each apartment, the distribution of heat and cooling will take place via an underfloor system.

The condominium will have Casa Clima certification which allows the construction of houses with very low energy consumption and which offers, at the same time, a high thermal comfort and respect for the environment.

The works will be completed in June 2024.
