

Building site to Peschiera del Garda

Ref. P 28.59

In Peschiera del Garda, in a residential area convenient to amenities and the lake shore, a new, modern and refined complex will be built, enhanced by a splendid shared swimming pool.

The project features an elegantly designed building, comprising just eight residential units, with various types of finely finished apartments, designed for those who wish to live or spend their leisure time on one of Italy's most renowned lakes. The residence will be spread over three floors, served by an elevator; the basement will feature large garages for each unit.

The homes will feature private gardens or large terraces, while the second-floor units will be further enhanced by an exclusive sundeck, an outdoor space designed to offer comfort, privacy, and a pleasant outdoor experience, perfect for moments of relaxation and conviviality.

The entire project will be built using cutting-edge construction technologies, designed to ensure high standards of comfort, energy efficiency, and thermal and acoustic insulation.

The complex will be built in a particularly convenient location: close to the center of Peschiera del Garda, the lake shores, and major services such as supermarkets, the hospital, bus stops, the train station, and amusement parks.

A contemporary, private, and high-quality setting, ideal for those who want to live near the lake in a well-kept and comfortable environment.

Expected delivery: Spring 2028.
